

## BAKO TRAINING-SUPPORTSYSTEM

‘Make training harder than any real-life situation’ – this is the motto used to train special forces so that they can work more calmly and routinely in real-life situations. With the BAKO-T.S. system, the training vehicle becomes the next challenge on the way to becoming a THL specialist. Realistic training preparation for vehicles is now no longer a problem with the BAKO-T.S. system.

Scope of delivery: 1x BAKO-T.S. carrier / 3x shackles

Product-ID	720420
Measurement	1.600mm x 800mm x 600mm
Weight	68 kg
Material	Steel
Maximum lashing force*	51 kN
Required accessories	2x BAKO-Chain rescue set 51kN / 79kN

\*Permissible load when operating mechanical pulling devices (pulling) / not approved for lifting

\*\* Vehicle with mechanical pulling device required / attachment point with sufficient load-bearing capacity required
